Hi Steve,

In an e-mail I'm sending in a bit, I'll reply to your question about purely finding reported quantities of ammonia. In the meantime, I really can't comment or tie anything to pending investigations, including Hickman's. Hope you'd understand – thanks!

Subject: TRI ammonia research

I wonder if there is a way to find the top releaser of ammonia using the TRI database?

I want to compare the facility and amounts with what our preliminary calculations of ammonia releases are from the two Hickman's facilities in Arizona.

The Tonopah facility, with 3,072,000 birds, releases 4,014 lbs/day, or 1,465,139 lbs/year, per our calculations.

The Arlington facility, with 5,876,261 birds, releases 7,678 lbs/day or 2,802,580 lbs/year, per our calculations.

Thanks,

Steve Brittle
